

Additional Guidelines for Submission

Overview

- Proprietary academic technology in the therapeutics space
- <4-5 years from the clinic
- Have not received venture funding (e.g., seed/series A)
- Does NOT need to have a legal entity or management team
- Must be submitted by the researcher or corresponding TTO
- Any relevant asset must be available for development in a start-up

1-Page Content

Foundational scientific rationale and description of therapeutic approach

- E.g. scientific thesis which provides details on relevant biology, pathway, or chemistry that supports therapeutic application of an innovative therapeutic modality

Differentiation over existing/competitive approaches with supporting data

- E.g. ability to address a therapeutic need over current therapies or modalities

Near-term research plan (next 12 months) and resources required

- E.g. critical experiments required to further validate approach/thesis

Format

- Suggested structure: Summary, Background/Context/Overview, Rationale, Research Details, Impact/Advantage, and Conclusion

Additional Materials May Include, But Not Limited To:

- Key publications or reviews
- Non-confidential figures or key data to support proposal can be attached as separate documents
- Grant with non-confidential information
